Monthly Recap

September in Review

Wait! What? Where did September go? At least we had a great day for our picnic (more on that later). We are approaching swap season, and those events are listed on the next page. We had some show and tell at the last meeting:

Jim Hatzenbeller brought in a fiberglass Glasair fuselage that will be powered by a DLE 20. Jim recently finished a full scale Glasair and is started to get flying hours on it. This model will look great next to the big one!

We had two visitors, a father and son pair, Wade and Ethan attend the last meeting. They recently attended a Flite Test event, built their own foam-board planes, and now have the bug for RC. If anyone is not familiar with Flite Test, check out their website and YouTube videos. They do some wild things with RC.

AROUND THE AREA

Upcoming Events

Swap Season is upon us!

Typically, I get our area events from the AMA website, modelaircraft.org. They have recently changed the format of the website and the events calendar just isn't what it used to be. I feel that many events have gone missing. Therefore, I apologize if I miss reporting on any events, but will do my best to keep my ear to the ground and report on what I know.

10/6/2018, 8AM—12PM

End of Season Swap Meet

Woodland Aero Modelers

Trinity Lutheran School

Burr Ridge, IL

Event Recap

RAMS Members Picnic

We held our annual picnic on Sunday, Sept 23. It was postponed a day due to flooding on the field. Sunday was a beautiful day and a great day for flying.

This marks the unofficial end of the main flying season as the cooler weather rolls in. A big thank you goes out **Bob Glowienka** for all his hard work throughout the year to make the field amazingly flyable. Another big thank you goes to **Tom and Pam Young** for grillin' and servin' up burgers, brats, and dogs all day long.

The picnic is always a day that I look forward to because, honestly, it's great to see everyone at once rather than separately throughout the year. This year, we saw a good amount of planes at the field, some zagi combat, a few aerobatic presentations, a new plane maiden, a few paratrooper drops, and some jet action.

So, how many guys does it take to start an engine?

In fact, we don't know. Even with all this help, **Jeff Wisneski** couldn't get this plane started. Some picture highlights are on the next page.

All photos are on our [Flickr](#) page.

From Around the Internet

Some Random Things to Share

I recently started following Dubro on facebook (Yay, finally a practical reason for social media). They share things about various events or sometimes just to be funny. Here is a couple that I wanted to pass along.

A scary close call from a fly-in in Texas, where this B-17 crashed into the pits area. Thankfully the safety barrier did its job and no one was touched by the plane.

If you have a few planes in your hangar, but are always looking for your next one, you might appreciate this funny meme of the boyfriend with his girlfriend. I don't understand why they all just can't get along.
