Call to Action

FAA Proposed Rule Changes

Thanks to everyone who took the time to express their comments and concerns to the FAA regarding new rules for model aviation, especially the requirement of remote ID. As of 3/1/2020, there have been over 34,000 comments submitted. It's said to hear of people giving up the hobby because of these extra restrictions.

At the Daytona 500:

The Daytona 500 was delayed a day due to rain, so you may not have watched the race. A highlight was the paint scheme of the No. 43 car, which will resemble the iconic A-10 Thunderbolt II aircraft, right down to the tiger shark teeth on the grill.

Monthly Recap

February in Review

We had a couple of warmer days this month, which led to a gathering of ski flyers. Pictures are on Page 3.

This month the EAA also hosted the Ski Plane Fly In up at Oshkosh. Pictures of this are on Page 4.

We had some show and tell at the last meeting:

Todd Schmitt started working on a Sig J3 Cub kit and brought in its wing. It will have a 74" wing span covered in monokote and Todd is still considering its power source.

Bryan Lorentzen brought in his custom built Needle glider. Bryan mentioned that this was probably his most "home-made" model and showed us how little room there is for components in the fuselage.
