Monthly Recap

April In Review

Last month we held our first in-person meeting at the Waukesha Airport Conference Room. It's a beautifully updated room and the meeting went quite well. It was great to see everyone there, we got to see some real show and tell, and we were still able to host the Zoom meeting for those who could not make it to the airport.

We discussed a new legal requirement created by the FAA called The Recreational UAS Safety Test (TRUST). You can read more about it and take the test here: <https://trust.modelaircraft.org/> Similar to the UAS registration, it is the law and between you and the FAA.

Monthly Recap

Show and Tell

Jeff Borowski is channeling his inner Green Goblin and brought in a Precision Aerobatics Addiction V2. It is a very light, 3D airframe and

is fully illuminated with LEDs and can be turned on and off from his transmitter.

Joe Milanowski has been working on his 1/5 scale Champ that we showed some pictures of in the February newsletter. He brought

in his plans for the plane and also the mold and cowl he has been working on vacuum forming from scratch.

Not pictured because he was on Zoom, but new member **Greg Dake** has been working on a QuickOats kit that is looking close to completion
