Event

February & Future Events

Future Events

At the last meeting, we set some dates for upcoming events at the field. On **July 22**, with a rain date of the 23rd, the **SWARM club** will host their annual rotor-craft only event utilizing the whole field. They are also going to make it an actual AMA sanctioned event.

We also set a date for the annual **RAMS members picnic** on **September 16th** with a rain date of the 17th. These events will be sticky noted on the next page and more information will come as we get closer to these dates.

Past Events

On February 18th, the Fox Valley Aero club hosted a swap meet in St. Charles IL. I saw several members of our club there! Awesome! I

hope you guys found some goodies that we will see at the field soon.

I don't think anyone bought this giant F-16 though. :(

Monthly Recap

February in Review

At the last meeting, **Tim Sorensen** demonstrated flight control stabilizers. His Ultra Stick receiver has a stabilizer built-in. Tim gave some tips about installing the receiver, enabling its operation on a transmitter switch, and also being able to adjust the gains on the

transmitter while testing it out. Tim showed how the control surfaces move when he moved the plane in an unexpected way.

Welcome back to the club **Andy Runte**. Andy is known for combat flying and he brought in an E1000 electric combat plane, which is a newer class of competition. The plane uses a 3S 1000mah battery. For more information about the power system, go to the RCCA.
