# The RAMS Horn

**Event**

## RAMS Members' Picnic

It was great to see so many members at the club picnic. We had a great day of comradery and flying! The weather was perfect too. Who would have thought the prior weekend would be freezing and we landed on a good one. Well planned! A big thanks to **Tim Sorensen** for bringing the drinks and getting the pizza and to **Bob Glowienka** for all the work on getting the field perfect. Thanks for **Mike St. John** for the aerial photography.

## AROUND THE AREA

## What's New

## Changes in the RC Hobby

Here's a few things going on in the hobby world

**Sullivan Products** site is back up and running. Sullivan's parent company was planning to ditch its RC products and a long time employee bought this part of the company. The website was offline for most of the summer while the new ownership got setup. Most of the Sullivan product line is there available again.

<https://sullivanproducts.com/>

**A&E RC Products** is a company that I had not heard of before, but I contacted Sullivan products to find out if they were still making the Harry Higley line of propeller hubs and nuts. They informed me that this product line was sold to A&E. I do not see these on their website yet, but will inquire about it.

<https://aercproducts.com/>

**SIG Manufacturing** has physically moved to Des Plaines, IL and are up and running again. They have SIG and Seagull ARFs and are proceeding to produce kits again. Their website states that they will be adding aluminum spinners to their lineup, which will be interesting to see what they are like now that Tru Turn spinners are no longer around.
