**Monthly Recap**

## April in Review

What a month for severe weather! We had several days of storms fly through the area and days of extreme winds with gusts of 70 MPH. A tornado even touched down just South of the field.

Surprisingly all of our trees remain standing, minus some branches. Though we did have damage to our small shed and Port a John. Thankfully neither were in use at the time. We have been talking about getting a new one anyway! And a replacement is in the works.

## AROUND THE AREA

## Upcoming Events

05/17/2026

**Lodi Area RC Club?**

They usually have a fun fly and swap meet, but nothing is listed.

## Monthly Recap

## April in Review Continued...

One of our neighbors a little further South on 76th street had a few buildings get knocked over. That building is not supposed to be leaning.

The field is looking good for the season though. The southern runway is completely usable and mowed. About half of the East-West runway is mowed. Out West likely has standing water although it may not look it from afar.

## Show and Tell

## April Meeting Wings

**Doc** brought in his scratch built Bird Dog. The plane is foam, cut using a hot wire and fibreglassed using Midwax polyurethane.

## At the Field

## Student Success!

The students at MSOE were welcomed at the field with their design project that they created, built, and flew. There were several test flights that included deploying a banner in air and adding weight to simulate passengers. The sky was a little gray with rain on the way, but the flights were a success and the plane made it home in one piece.
