Show and Tell

Years in the Making

Tim Sorensen has been keeping us up to date on his progress restoring this Fokker D7 that has a lot of sentimental value for a friend. It is finally finished and here are the before and after pictures. Tim estimates he spent 60 hours on it over 2 years. Even though it looks amazing, Tim is not for hire :)

Show and Tell

Models at the April Meeting

Frank Berefsky brought in this Freewing F-14 Tomcat that has twin 64mm fans. Frank showed us the retracts, wing sweep, and the thrust this thing can produce.

Everyone gathered around **Rick Schaber** to see his 3D printed J3 Cub. The design is from 3dlabprint.com, which has lots of aircraft designs. Even the wheels are printed using a little softer filament.

Mike McCullough showed us this recently completed Great Planes Waco. It's powered by a RCGF Stinger 26cc and has Woodstock behind the controls.

At the Field

Rebuilding After the Storms

We had many members come out and help clean up the mess that was left after the storms destroyed our small shed and port-a-potty. On the May 9/10 weekend, the wood foundations were dug up and that plus the sheet metal was hauled off to the dump.

Over the Memorial day weekend, the crew was back at it building the foundation and assembling the new shed. Thanks to **Tim Sorensen, Kevin Rosciszewski, Lloyd Scharles, Bob Glowienka, Curtis Beck, Dave Lane, Bill Geipel, Mike McCullough, Roy Hippert** for helping out! Also a big thanks to **Greg Dake** for making a donation for the improvements!
